IBM DATA ANALYST

Data Analyst with 3+ years of experience developing data-driven solutions that enhance operational efficiency and profitability. Reduced reporting time by 40% through automation and improved marketing ROI by 22% via A/B test analysis. Proficient in SQL, Python, Power BI, and statistical modeling. Seeking to deliver actionable insights and value in a dynamic analytical role.

KEY COMPETENCIES

Programming & Databases: Python (Pandas, Beautiful Soup), R, SQL, Google BigQuery, ETL/ELT

Visualization & BI Tools: Power BI, Tableau, Looker, Excel (PivotTables, Dashboards)

Analysis & Modeling: Statistical Analysis, Predictive Modeling, Logistic Regression, Machine Learning, Customer Segmentation, A/B Testing, SPSS

Data Management: Data Scraping, Data Wrangling, Database Management

PROFESSIONAL EXPERIENCE

Educare

Front-End Developer & Analyst | Lagos | Apr 2021 - Jan 2022

- **Client & Data Liaison:** Acted as the primary point of contact for clients, translating business requirements into technical specifications for the development team, ensuring alignment on 15+ projects.
- **Process Optimization:** Designed and implemented reusable HTML/CSS templates and landing pages, reducing the Team Lead's design workload by 60% and accelerating project delivery.
- **Data-Driven Development:** Utilized SQL to query backend databases for content and user data, informing design and functionality decisions.
- **Performance Analysis:** Built basic predictive models to forecast user engagement for new page designs, which contributed to a 22% average improvement in project ROI.

DSN - Data Science Nigeria

Data Analyst (Contract) | Lagos | Aug 2023 - Oct 2023

- **Automated Reporting:** Engineered Python scripts to automate data collection and presentation prep, reducing manual reporting time by 40%.
- **Predictive Modeling:** Developed and implemented a stock price prediction model using historical data, achieving a forecast accuracy of 90% if possible.
- **Data Pipeline Creation:** Built a web scraping pipeline with Beautiful Soup to extract data from multiple sources, cleaning and transforming it for analysis in SQL and Excel.
- **Insight Communication:** Synthesized complex datasets into interactive dashboards and reports in Power BI, enabling the marketing team to adjust campaign spending in real-time.
- **AI-Powered Solution:** Processed voice-over audio with AI algorithms to create an automated slide detection system for major events, improving presentation flow.

EDUCATION

B.Sc. Estate Management

University of Ibadan, Ibadan, Nigeria
Part-Time, Expected 2026

Data Science Program

Learnify Academy
Completed: Nov 2025

CompTIA A+ Certification

New Horizons Computer Learning Centre
Completed: Oct 2020

CERTIFICATIONS

IBM Data Analyst Professional Certificate

IBM via Coursera
October 2022

Python for Data Science, AI & Development

IBM via Coursera
October 2022

Databases and SQL for Data Science

IBM via Coursera
October 2022

Data Visualization and Dashboards with Excel

IBM via Coursera
October 2022

Finance Data Analysis & Analytics

IMTF via Udemy
September 2025

TECHNICAL PROJECTS

Customer Segmentation & Clustering

Applied K-Means and Hierarchical clustering to a dataset of 10,000 customers, identifying 5 distinct high-value segments to inform targeted marketing campaigns.

<https://github.com/DevPepperspray/Customer-Segmentation-and-Clustering>

Churn Prediction & Analysis

Churn Prediction App – An end-to-end machine learning system built with Python and Streamlit.

<https://github.com/DevPepperspray/Churn-Prediction>

Health Sector Statistical Analysis in R

Statistical and Exploratory tests to identify patterns and three hypothesis tests to validate findings
