PROFESSIONAL PROFILE

IBM Certified Data Scientist with **4+ years** of experience delivering end-to-end data solutions. Proven track record: **40% reduction** in reporting time, **22% lift** in marketing ROI, and **\$500K+ potential annual savings** through predictive modeling.

Expertise spans machine learning, statistical analysis (R/SPSS), SQL, and interactive dashboards (Power BI/Tableau).

CORE COMPETENCIES

Python (pandas, scikit-learn)

SQL / BigQuery

R / SPSS

Machine Learning

Power BI / Tableau

Predictive Modeling

A/B Testing

Web Scraping

ETL / Data Wrangling

Statistical Analysis

Customer Segmentation

Time Series Forecasting

WORK EXPERIENCE

Data Analyst Intern

Data Science Nigeria (DSN) – Lagos

Aug 2023 – Oct 2023

- Automated data collection & reporting pipelines with Python → reduced manual effort by **40%**.
- Developed stock price forecasting model (90% accuracy) using time series analysis.
- Built web scraping pipeline (Beautiful Soup) aggregating data from 5+ sources.
- Designed Power BI dashboards enabling A/B test analysis → **22% increase** in marketing ROI.

Front-End Developer & Analyst

EduCare – Lagos

Apr 2021 – Jan 2022

- Translated business requirements into technical specs and SQL queries for user engagement data.
- Engineered reusable HTML/CSS components → **60% reduction** in design time.
- Built predictive models to forecast user activity, driving content personalization.

KEY PROJECTS (SELECTED)

CERTIFICATIONS

- **IBM Data Analyst Professional Certificate** (2022) – 9 courses
- Data Scientist in Python – DataCamp
- Data Analyst in Python – DataCamp
- Associate SQL Developer – DataCamp
- Finance Data Analysis & Analytics – IMTF (2025)
- CompTIA A+ | HubSpot SEO & Email Marketing
- Cisco: Intro to Cybersecurity, Cyber Sec Fundamentals

EDUCATION

- **B.Sc. Estate Management** – University of Ibadan (2026 expected)
- **Data Science Program** – Learnify Academy (2025)
- **Data Analytics** - IBM (Completed 2022)

ACCOMPLISHMENTS

- Web Scraping in Python (DataCamp)
- Intermediate Python (DataCamp, 2026)
- Building Your Own Database Agent (DeepLearning.AI)

Patient No-Show Prediction

Analyzed 110K+ medical records using 5 ML models (79.6% accuracy). Identified top drivers: wait times >30 days → 35% no-show rate. **Potential annual saving: \$500K+** for healthcare providers. *Python, Scikit-learn, Power BI.*

Healthcare Financial Dashboard

Interactive Power BI dashboard analyzing £3.36M billing, top revenue drivers (X-Ray 31%, CT Scan 24%). Used DAX, Azure maps, and custom date tables to uncover patient out-of-pocket trends.

Customer Segmentation & Clustering

K-Means & Hierarchical clustering on 10,000 customers → identified 5 high-value segments for targeted marketing campaigns. Delivered actionable insights to increase retention.

Stock Price Prediction

Built time series forecast model (ARIMA) achieving **90% accuracy** on historical stock data. Integrated with automated reporting pipeline.

Housing Market Analysis (SPSS)

Quantified impact of Nigeria's monetary policy (CRR, MPR) on Ibadan housing prices. Segmented regression analysis showed CRR drives 2-bedroom prices, MPR drives 3-bedroom.

TECHNICAL ENVIRONMENT

Python (pandas, sklearn, bs4)

SQL (PostgreSQL, BigQuery)

R / RStudio

Power BI / Tableau

SPSS / Jupyter

Git / GitHub

HTML/CSS / Figma
